About This Game

A Psychological Top-Down Shooter where you don't have to kill everyone. Utilize a mix of Action-stealth game play, turn invisible and outsmart your enemies. The story of a Terrorist who is given a second chance to redeem himself.

Fast paced, Tight and responsive game-play - Taking out enemies feels punchy, satisfying and immediate.

Quirky, charming and outright bizarre dialogue - Interact with in-game characters that have dialogue inspired by Earthbound/Mother Series.

Dynamic and Bumping soundtrack - A huge soundtrack with unique music changes as you play.

Pretty Pixel art - A game created with a deliberate and distinct pixel art animation style.

Free-form Stealth-Action - Go in guns blazing, or turn invisible and take out your enemies strategically or utilize a mix of both.

A mysterious event - Uncover the truth of this terrorist attack and the motives behind the people you're hunting down.

Dynamic gun-play - A wide variance of weapons to utilize, almost every single weapon in the game plays differently than the other.

What will you choose? - You decide who lives and who rightfully deserves to die. A shooter that doesn't just involve killing people...

...

A video game created by a single person with love.

I hope you enjoy my game.

-Brandon

Epilepsy warning, this game contains flashing imagery.

shoe.. **July 3rd Update: Community Server Fixes and Feature Improvements:**

In this update we're fixing a selection of issues with Community Servers and made a few small tweaks around the place

FEATURE IMPROVEMENTS. Dirty Bomb® 1st Edition Crafting is now permanent:

One thing we talked about a lot as we ramped down Dirty Bomb is how we provide the best, most complete experience we could for players. Adding old content, re-releasing Obsidians, removing real money transactions all aided that, but lots of people kept on asking for 1st Edition Cards.

1st Edition Cards contain different Loadouts and look different compared to 2nd Edition Cards (Proxy still has both eyes!) but

were phased out a few years ago. We brought them back sporadically during events.

This update will allow all players to Craft 1st Edition Loadout Cards for Mercs that have them (nothing for Turtle, Javelin, Guardian or Hunter, sadly), but you won't be able to buy 1st Edition Prime Cases.

These Loadout Cards will also be tradable on the Steam Marketplace.. **New Dev Video: FACEIT Progress:**

Hey all,

FACEIT is a big part of 1.0 and with it Drafting is coming too..
